SUMMARY

Detail-oriented and dedicated QA Manual Tester with 3.5 years of hands-on experience in software quality assurance. Adept at designing, executing, and documenting comprehensive manual test cases to ensure software reliability and a seamless user experience. Strong in identifying defects, collaborating with cross-functional teams, and delivering high-quality products. Committed to continuous learning and process improvement. Holds additional exposure to automation testing, complementing strong manual testing expertise. .

WORK EXPERIENCE

Knovos India Pvt. Ltd — Quality Assurance Engineer

june 2022 - present

- Led comprehensive QA efforts across web platforms, executing manual test cases, managing full-cycle testing (functional, regression, UAT), and driving defect resolution.
- Worked with product and dev teams to clarify requirements, uncover edge cases, and escalate critical bugs for quick resolution.
- Performed advanced SQL-based data validation to ensure consistency between front-end displays and backend database records.
- Conducted log analysis to trace data processing workflows, identify anomalies, and assist in troubleshooting system-level issues.
- Documented test outcomes, contributed to root cause analysis, and recommended process improvements to enhance QA efficiency and product reliability.
- Integrated manual and automated test execution into the CI pipeline, contributing to faster feedback loops and improved team productivity.

PROJECTS

Knovos GRC – Information Governance Platform

[Product Link](#)

Knovos GRC is a comprehensive information governance solution designed to provide enterprises with full visibility and control over distributed data across locations, devices, and applications. The platform streamlines data identification and collection for eDiscovery, internal investigations, and regulatory compliance (GDPR, CCPA, CPRA). It features built-in analytics to assess data risks and supports rapid response to data breach incidents.

EDUCATION

2020 - 2022 Master of Computer Applications at **GLS University**

2018 - 2020 Bachelor of Computer Application (BCA) at **Gujarat University**

SKILLS

Database: Skilled in writing complex SQL queries to validate product specifications and ensure data integrity across relational databases.

Programming: Basic scripting in Python (for automation support).

Other Skills: Log analysis, requirement gathering, and test documentation.
